

How Do I Use the Laundry System?

QA It is very easy. When you are ready to wash, place clothes into the washing machine with enough for a normal load and place the Life Miracle® Laundry System units on opposite sides of the agitator. Set the washing machine to whatever setting you normally use and start the machine.

The water temperature setting of hot has shown to achieve the best results with the Life Miracle® Laundry System, therefore we highly recommend it. You may, however, use any temperature you wish.

The Life Miracle® Laundry System units may remain in the washing machine throughout all cycles.

When final cycle is completed and machine shuts off, remove the Life Miracle® Laundry System units and set them aside to use with the next load of clothes. The units most likely will be attracted to one another in the machine. This is completely normal and does not adversely affect their cleaning performance.

Note: For additional optional savings, you can manually bypass the rinse cycle right before it turns on. Since there are no chemicals used in the process, you don't have chemicals to rinse out. This can save up to 30 gallons of water and all of the electricity, heat and sewage to run the rinse cycle. It all adds up to very big savings over time.

Can I Use Chemicals In the Wash With the System If I Choose To Do So?

QA Using bleach, liquid fabric softeners or even detergent with the Life Miracle® Laundry System will not be detrimental to the units. But be aware that using chemicals may reduce the substantial health and environmental benefits the Laundry System offers. It is safe to use diluted bleach directly with the System and is in fact the only way to get "whiter whites". An good alternative to chlorine bleach is oxygen based bleach now sold in many stores.

A good stain pretreating product is suggested for really tough, set in stains. We created an all-natural enzyme spot remover for this purpose. Use of baking soda may also help to boost the cleaning action of the Laundry System.

There is no scent when using the Laundry System. Therefore you must weigh your need for a perfumey smell vs. the health and environmental factors of adding chemicals and dryer sheets for this purpose.

Can You Use the Laundry System In Front Loading Washing Machines?

QA Yes. However, Front loaders need to have a full load before running with the Laundry System. The spinning horizontal axis may cause added stress to the Laundry System units without a full load of laundry. Another strong recommendation is to place the units inside a durable piece of clothing such as a sock to provide further protection. This will not adversely affect the cleaning action.

Care & Maintenance

If you are using your own washing machine, you may leave the Laundry System units inside the water drum for their next usage. If you use community laundry facilities, remove them and store in a safe place for next usage to avoid theft. The ends of the Laundry System units may become slightly discolored over time because of attraction of metal, etc. in clothing. This is normal. They can be completely cleaned by scrubbing them a little with water and a washcloth.

WARNING: Do not bring the Life Miracle® Laundry System near TVs, computers, computer disks and monitors, audio tapes, video tapes, or anything else that is adversely affected by magnetic fields. Keep away from pacemakers as well. Do not place Laundry System units in mouth, throw the units, cut them open, or use them for anything other than their intended purpose of washing clothes. We are not liable for any of the above abuses and such abuse voids the lifetime warranty.

L i m i t e d L i f e t i m e W a r r a n t y

The Life Miracle® Laundry System is guaranteed to perform as long as you own it. If the system breaks down in the purchaser's lifetime, simply send it back to us and we will repair or replace them. Warranty is voided if units are used for any application other than laundry usage or if warning notice (above) has been disregarded. The Laundry System is not a toy. Keep it out of the reach of children. Warranty claims must be accompanied by \$7.95 USD for shipping and handling (\$16.95 outside U.S.), the original box, and dated receipt or some other proof of purchase. Pre-registration with the enclosed warranty registration card. The mailing address is on the back of this brochure.

What Is the Life Miracle® Magnetic Laundry System?

QA The Laundry System is an amazing patented and independently proven breakthrough in functional technology that allows you to wash your clothes using the power of renewable magnetic force, rather than non-renewable chemicals.

Why Should I Use It?

QA You will gain many benefits from your decision to use the Laundry System. ~~Here~~ are just a few of them:

Health Benefits: If you are one of the 33% of the population that suffers from chemical sensitivities or allergies, you may find relief if the cause of your suffering is the chemicals found in detergents. Many people suffer reactions from the chemicals imbued in their clothes, or the perfumes and synthetic scents used in many laundry products.

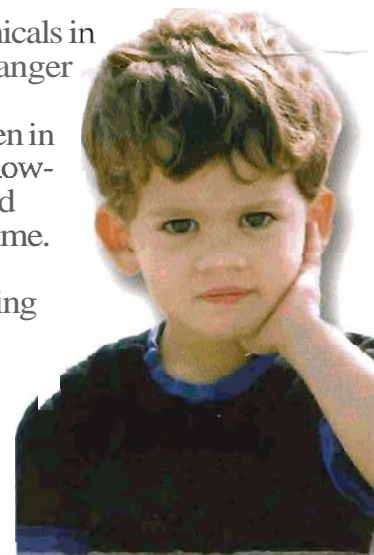

Convenience: You will find that using these portable units is a lot easier than lugging large, heavy detergent containers from the store. You just place the units in the washer and turn it on!

The Environment: Less chemicals being dumped into our environment means a cleaner environment. Imagine the positive impact of just one person not flushing chemical detergents into the environment day after day, year after year. One person who cares can make a difference!

Save Money: For many, the money they will save by switching to the Laundry System is incentive enough. For a family of four doing three loads per day, the savings can be significant. The leading detergent costs approximately \$0.21 per load. Over the course of just one year, the family in this example will save \$226.80 on detergent costs!

Do It for Them: Less chemicals in a household means less of a danger your children can get hurt by them. If you have small children in the house, you can rest easy knowing there is no detergent around that they can mistakenly consume.

Additionally, they may be having health challenges related to chemical use. The freer your home is from toxins, the healthier you and your family will be.
